**1)**

Login using the default username and password "admin"
Click "Local Host"

2)

Click Create to create a new character

3)

Click on sorcerer, priest or warrior on the side. Warrior animations are currently bugged so pick at your own discretion. Type in your character name and hit Create

3)

Select your character at the login screen and press start to enter the world

4)

Upon logging in you will see this. Click the "M" button on the top left of the screen to teleport to the test area

5)

Press "K" on your keyboard to enter keybind mode. Keybind mode lets you create bars to put your spells and abilities on.

6)

You've created your bars! Now hover your mouse over individual button slots and click on a keyboard button like "1", "2", "3" and "4" to set your key binds.

7)

Now that you have created your buttons and key binds you can press "P" to open your spell book and drag spells from the spell book onto your bars. Alternatively you can click them from the spell book.

8)

Once you've dragged spells onto your bars you can click the enemy and cast a spell on him, here you can see an "Ice Bolt" being casted. The cast bar shows how long in the cast and you can see your target in the UI.

9)

Congratulations you've casted a spell! These are the basics of the game, there are different

specializations for sorcerer and priest you can switch to if you press "N". Talents don't function yet but they are being worked on.
